As you are aware from the 6th December 2010, all new first time learner permit holders for motorcycles must take mandatory Initial Basic Training (IBT) with an RSA approved IBT registered Motorcycle Trainer. **The new learner permit holder will only be permitted on the public road if accompanied by an RSA approved -IBT registered trainer. When the trainee has completed and passed their IBT course they will be issued with a Certificate of Completion.** Under the law, a learner permit holder must produce the Certificate and learner permit for inspection if a Garda requests them. If the learner permit holder fails to produce the required documentation, they may be prosecuted. **The certificate will also need to be produced when taking a driving test**

The purpose of IBT is to help learner motorcyclists to master basic motorcycling skills and improve their knowledge of road safety before they ride unsupervised. The standard course is 16 hours in duration and is broken into four modules which combine theory and practice. The modules cover a range of motorcycling skills and requirements, including Personal Protection Equipment (PPE); technical skills for riding a motorcycle; legal requirements for motorcyclists; and how to share the road safely with other road-users.

Initial Basic Training (IBT) takes place in a number of settings- in a classroom, on a training site, out on a public road under the supervision of the trainer to make it more varied and interesting for the learner. All training undertaken with an IBT instructor must be logged in a personal log book which the trainer will issue to the rider when commencing the first module. At the end of each completed module the Trainer will stamp the log book for each completed module until all four modules are completed following which a Certificate of Completion will be issued.

An IBT certificate will also be required by the insurance companies before cover will be provided.

**Call Eddy or Dave on 087-2578225 for more information.**
